

GUIDO SCHEPERS

CURRICULUM VITAE

OVERVIEW

I'm a passionate Data & Support Technician eager to transition into a Developer role, bringing hands-on experience from the e-commerce industry and a dedication to creating innovative tech. I have a passion for coding, which is why I'm actively seeking opportunities to expand my development skills and contribute to impactful projects with fresh, creative approaches. Ready to collaborate, learn, and help build some cool tech!

What I'm Looking For:

- A company culture that values teamwork, creativity and self-expression, where individuality such as visible tattoos and piercings is embraced.
- Opportunities to assist and train new hires and team members —helping others grow is something I find rewarding.
- A position that supports my growth into development, where I can continue building my skills and contributing to innovative projects.
- Ideally, I'd like a work-from-home role, but I'm open to hybrid environments as I also enjoy collaborating in the office.

WORK EXPERIENCE

- **Stock2Shop** 2022 - Present
Data & Support Technician

Working for Stock2Shop, I'm responsible for onboarding new clients and assisting with existing ones.
I write SQL queries to pull client data from their ERP system through our own in-house software, and write Python transforms to edit this data.
I also make use of JSON and XML mapping.

Responsibilities
 - Execute SQL queries to retrieve data from clients' ERP systems using in-house software.
 - Perform data transformations with Python and PHP to prepare data for integration.
 - Configure data using XML and JSON mappings to meet client requirements.
 - Onboard new clients, providing end-to-end support during the setup phase.
 - Support existing clients by troubleshooting system and server errors and implementing necessary code adjustments.
 - Train and assist new hires.
